

Abschlussarbeiten MSc Geology 2014

Thema	Betreuer/in	Ko-Betreuer/in
"A contribution to the understanding of shear zone networking, nucleation and propagation at Cap de Creus, Catalonia, Spain"	Stein	Carreras Planells
"Structures at the distal limit of the Tschirgant rock avalanche, Tyrol, Austria"	Dufresne	Prager
"The tectonic evolution and sedimentary development of the Ashmore Platform and the northern Browse Basin, NW Australia: a combined 2D/3D seismic-reflection analysis."	Back	Stein
"Leaching behavior of heavy metals from fine-grained MSWI bottom ash"	Gieré	Pomberger
"Characterization of silica precipitates formed at geothermal conditions"	Martinez	Bucher
"The Coal Mines in the Stockheim: a GIS-based Investigation of the Structure and Stratigraphy of the Stockheim Basin, Federal Republic Germany"	Tipper	Stein
"Synthesis and Characterization of Doped Ceria Produced by Wet-Chemical Methods"	Vogt	Danilewsky
"The Carbonatites of Stjernøya and evidence for crustal partial melting of carbonate from a diatexite migmatite at Øksfjord, Northern Norway"	Bucher	Redler
"Description and Analysis of 1976 Drill Cores from Itzing and Otting. Implications for the Nature of the Bunte Breccia Deposits"	Kenkmann	Stein
" ²¹⁰ Pb- and ¹³⁷ Cs-dating of a sediment core from Lake Biel (Switzerland) and source characterization of fallout Pu"	Gieré	Eikenberg
"Comparing single-particle analysis data obtained from scanning electron and light microscope images"	Gieré	Grobéty
"Photography of the Erbisberg drilling in the Ries impact crater"	Kenkmann	Stein
